Find it EZ Code Search now certified on Amazon RDS for SQL Server, adding support for parsing EXCEL and MS Query data source connection properties

KELOWNA, British Columbia, Canada, December 12, 2012 – Find it EZ Software Corp. has released Find it EZ Code Search Professional version 4.4.7, a Business Intelligence & Database source code search engine that automates software change impact analysis. Find it EZ improves software worker productivity, enabling organizations that maintain or depend on custom software to:

- Prepare more timely and accurate estimates
- Enhance software change management processes
- Improve code quality

Find it EZ eliminates cost overruns that are caused by underestimating or missing affected areas of an application that need to be modified whenever new specifications are proposed or your data model is changing.

The latest release includes enhanced support for Oracle and other major databases, the ability to scan Excel and MS Query data source connection properties, and Find it EZ can now be run concurrently by mutiple users on the same host machine (eg: on a central Citrix server):

- Connect to Oracle databases with TNS authentication.
- Option to "not save" any database connection passwords between sessions in order to comply with corporate security policies.
- Filter, group, sort and list all major database objects by Schema or Owner.
- New search options for Oracle Materialized Views, Packages (specs &/or body), Types (specs &/or body), Synonyms, Sequences and Java Source.
- Enhanced filtering of Oracle Reports. You can now selectively search Parameters, Links, Queries, Groups and more.
- Business Intelligence documentation now contains fully qualified database source where applicable (database.owner/schema.tablename).

About Find it EZ Software Corp.

Founded in 2010, Find it EZ creates productivity tools for software developers. Whenever changes are planned or made to the underlying database in any software application, it can be a challenge to find all referenced code that can be affected. Normally, each software layer or programming language would require time-consuming and disconnected analysis with a variety of independent tools. Find it EZ provides a full 360 degree view of the entire code-stack in a single integrated application. Case studies have shown that companies like Westinghouse, Sprint, The Mayo Clinic and Pan American Life Insurance, using solutions from Find it EZ to manage their software changes, have increased their productivity by 42% or more. Find it EZ Code Search received a Microsoft award for innovation in 2011.
