

## Find it EZ Code Search adds new BI docs for Crystal Reports, Xcelsius, Oracle Reports and SSRS

---

KELOWNA, British Columbia, Canada, September 23, 2012 – Find it EZ Software Corp. has released Find it EZ Code Search Professional version 4.2.0, a Business Intelligence & Database source code search engine that automates software change impact analysis. Find it EZ improves software worker productivity, enabling organizations that maintain or depend on custom software to:

- 🔍 Prepare more timely and accurate estimates
- 🔍 Enhance software change management processes
- 🔍 Improve code quality

Find it EZ eliminates cost overruns that are caused by underestimating or missing affected areas of an application that need to be modified whenever new specifications are proposed or your data model is changing.

The latest release adds wizards to extract and generate bulk documentation reports from an entire library of Crystal Reports RPT files. This includes an improved version of the built-in "Report Definition" and "Show SQL Queries" documents with the following advantages:

- 🔍 Use new Datasource Extract or SQL Queries reports to aid in conversion of embedded SQL code to new target databases ( stored procedures, views ) or report types
- 🔍 Instead of one-at-a-time, generate an entire set of Report Definition documents in seconds from all of your RPT source files
- 🔍 No extra garbage content, just clean, organized source code content with some value-added goodies like "unused formulas" and more recommended by well known Crystal guru, Ken Hamady
- 🔍 No need to view, copy and paste "Show SQL Query" content from individual sections ... dynamically generate ANSI SQL standard code without needing an underlying database connection or providing parameters for each query!

### **About Find it EZ Software Corp.**

---

Founded in 2010, Find it EZ creates productivity tools for software developers. Whenever changes are planned or made to the underlying database in any software application, it can be a challenge to find all referenced code that can be affected. Normally, each software layer or programming language would require time-consuming and disconnected analysis with a variety of independent tools. Find it EZ provides a full 360 degree view of the entire code-stack in a single integrated application. Case studies have shown that companies like Westinghouse, Sprint, The Mayo Clinic and Pan American Life Insurance, using solutions from Find it EZ to manage their software changes, have increased their productivity by 42% or more. Find it EZ Code Search received a Microsoft award for innovation in 2011.
