About Find it EZ Software Corp.

Founded in 2010, Find it EZ creates productivity tools for software developers. Whenever changes are planned or made to the underlying database in any software application, it can be a challenge to find all referenced code that can be affected. Normally, each software layer or programming language would require time-consuming and disconnected analysis with a variety of independent tools. Find it EZ provides a full 360 degree view of the entire code-stack in a single integrated application. Case studies have shown that companies like Westinghouse, Sprint, The Mayo Clinic and Pan American Life Insurance, using solutions from Find it EZ to manage their software changes, have increased their productivity by 42% or more. Find it EZ Code Search received a Microsoft award for innovation in 2011.
