Stony Brook Medicine

Find it EZ SOFTWARE

"Using "Find It EZ", in one simple step, we were able to search our full library of 1800 report within minutes! The savings in time and expense, and the increased accuracy are obvious. I found your support for the product to be unprecedented, providing an enhancement just one day after I requested it!"

William Levinson, IT Project Manager, Stony Brook Medical Centre

Stony Brook Medicine

Industry: Healthcare

⚠ Customer Use Case

We needed a universal change impact analysis tool that could scan a vendor supplied extensive and complex medical application quickly and accurately to pinpoint exactly which Crystal Reports or other programs linked to an Oracle database would be affected by a new Meditech healthcare software release.

✅ The Solution?

DevSurge 365 enterprise

Includes full support to search, document and mass change datasource connections in Stony Brook's library of thousands of Crystal Reports, stored within SAP BusinessObjects BI Platform, and Meditech's underlying Oracle database.

Multi-Pack Solutions

"I love the (Find it EZ) product. I have other tools I've used for SQL searches, but this one caught my attention because of Crystal Reports and multiple (programming language) searches from one app."

Stephe Faust, Information Technology Manager, Multi-Pack Solutions

⚠ Customer Use Case

We were looking for a tool that makes SQL searches faster and easier, enabling multiple searches from one app, that could be run even from a desktop, unlike other tools that have to be run from within SQL Server Management Studio.

✅ The Solution?

Provides Multipack software development staff with the ability to search, document and compare differences across all SQL Server databases and hundreds of Crystal Reports from a single app.

Pan-American Life Insurance Group

Find it EZ
SOFTWARE

"I can't put words to it how much value you brought to our company. It was amazing because I expected Find it EZ to be just a search utility tool, which to me in itself is fantastic, but I think the whole robustness of the tool is so much more than what I would consider to be a crystal reports search utility."

Melinda Kohorst, Sr. Systems Analyst, Pan American Life Insurance

PAN AMERICAN LIFE INSURANCE GROUP

Industry: **Insurance & Finance**

⚠ Customer Use Case

We needed a universal change impact analysis tool that could scan Pan- American Life's extensive and complex Enterprise software codebase quickly and accurately pinpoint exactly which Crystal Reports or other programs linked to a SQL database would be affected by a new custom mainframe software release.

✓ The Solution?

DevSurge 365 enterprise

Includes full support to search, document and extract schedule, report and database meta-data from Pan- American Life's massive library of Crystal Reports stored in SAP BusinessObjects BI platform, and underlying Microsoft SQL Server database.

Westinghouse Electric Company

Find it EZ
SOFTWARE

"I previously had to use multiple tools (grep, Toad, SS, etc.) to search each repository. This was a time consuming activity and required a lot of a baby sittings to complete each search. FindItEZ will allow me to perform a consistent search against all of our repositories that I can start and let run in the background while I perform other duties.."

Ron Landon, Information Systems Consultant, Columbia Information Systems

⚠ Customer Use Case

We needed a more efficient change management tool and process. Westinghouse has a large, custom application using multiple programming languages, reporting tools and databases with several distributed teams. They previously had to use multiple tools (grep, Toad, SS, etc.) to search each repository. This was a time consuming and disconnected activity, requiring a lot of baby sitting to complete each search.

✓ The Solution?

DevSurge 365 enterprise

Provides Westinghouse project management and lead development staff with the ability to perform complete change impact analysis across their entire code stack including multiple programming languages stored within Team Foundation Server and Visual SourceSafe, plus thousands of Crystal Reports stored in SAP BusinessObjects BI platform, and underlying SQL Server and Oracle database objects.

Industry: **Manufacturing**

Wood County Hospital

> "Prior to installing your software, we had no way to assess the impact a database schema change would have on our 800+ Crystal Reports published out on our SAP Business Objects server (version 4.1). With your software, I could easily connect to our SAP Business Objects server and simply build a list of all the tables and views I was interested in. In just a few minutes, I had a list of all the reports that referenced these tables plus could see the details of exactly where the table was referenced (selection criteria, SQL Expression, formulae, etc). And the price was very reasonable, the software has already paid for itself! "
>
> *Keith Battles, Software Developer, Wood County Hospital*

ⓘ Customer Use Case

We were looking for a software that would help us assess the impact a SQL Server database schema change would have on our library containing hundreds of Crystal Reports scheduled in an SAP BusinessObjects repository.

✓ The Solution?

Includes native connections to SAP business objects info-systems repository, with a set of built in reports and extracts that provided visibility and cross references to all Crystal Reports underlying Microsoft SQL Server database objects.

Industry: Healthcare

Nebraska State Government

Find it EZ SOFTWARE

"We needed a replacement for an outdated process used to produce internal Impact Analysis Statements from Crystal Reports. FinditEZ was able to do that with existing methods, but was not the exact solution we were looking for. After asking if there were any other options, the Find it EZ team added a new documentation wizard (Show SQL Queries), while we were still testing the trial version, even before we were a customer! We ended up choosing FinditEZ for is value, price and obvious quick attention to customer needs. We no longer have to maintain our original outdated process, and we have the side benefits of FinditEZ's many other options and search capabilities."

Russ Davison ,Office of the CIO, Nebraska State Government

Industry: **Government**

⚠ Customer Use Case

We needed a new application that would help us to support newer versions of SAP BI technologies and replace an internally developed program that produced internal impact analysis documentation from our library of hundreds of Crystal Reports.

✓ The Solution?

CodeSearch PRO desktop

With some custom development provided during the evaluation process, Code Search Pro replaces an aging internal program while also offering additional change management features over and above the consistent, automated documentation production Nebraska Gov was looking for.

Carillion

"This is an excellent, powerful, invaluable, fast product that I use to assess database structure changes to the 1600 Crystal Reports and million lines of SQL stored procedures. Tech support has been extremely proficient."

Terry Masenko, Senior Solution Architect, Carillion

⚠ Customer Use Case

We were looking for a solution to pinpoint all references to our underlying SQL Server database whenever changes to the database model could affect our large set of Crystal Reports or other inter-related database objects.

✓ The Solution?

CodeSearch
PRO desktop

Provides Carillion with a database cross reference to their hundreds of Crystal Reports as well as an interactive search tool supporting both their rpt files and SQL Server databases.

Industry: **Construction**

Kass Shuler, P.A.

"FindITEZ makes it EZ to search for items in just minutes that in the past could take a couple days.This makes evolving as a department and company much more efficient. Time is very valuable and this saves us a ton."

Daniel Cohen, Business Systems Analyst, Kass Shuler, P.A.
,

**Industry: Legal
            & Business Services**

⚠ Customer Use Case

It used to take several days for each developer to search our library of Crystal Reports for the effect of changes in our underlying database. We needed a tool to help us improve our searching efficiency and accuracy.

✓ The Solution?

Provides Kass Shuler IT staff with the ability to search and document all database references within their library of thousands of Crystal Reports, improving accuracy, freeing up resources by saving both time and money for the organization.

Petroleum Traders Corp.

Find it EZ SOFTWARE

"We use Crystal Reports and for our data source we normally chose to write a custom command to pull the data from the SQL Server. There is only one other program I know of right now that allows us to search these commands, but it forces you to give it a value for any parameters the report may have before it's able to search that text. Find it EZ works great and for searching Crystal Reports I have found it better and faster than any other product!"

Dan Espitch, CIO, Petroleum Traders Corp.

PETROLEUM TRADERS
Corporation

Industry: **Wholesale**
& Distribution

ⓘ Customer Use Case

We were finding it difficult to efficiently search our library of hundreds of Crystal Reports because of our standard use of custom SQL Commands embedded within our library of reports. We needed a tool that would allow us to search all of our reports at once for any database references within these Crystal SQL Command objects.

✓ The Solution?

CodeSearch
PRO desktop

Provides Petroleaum Traders development staff with the ability to search their entire Crystal Reports library in seconds. Also allowed them to search their underlying SQL Server database for inter-relationships whenever their data model changed.
